

## TECNICAL DATA \*

**Length** 750 mm [29.52 "]

**Nozzle diameter** 310 mm [12.2 "]

**Body Diameter** 245 mm [9.64 "]

**Weight** 27 kg [ 59,5 lbs]

**Thrust** 34 kg [ 75 lb]

**Maximum speed** Depending on equipment and diver

**Autonomy at maximum** 70 minutes

**Autonomy at cruising** 245 minutes

**Maximum Deppth** 130 mt (426 ft)

**Buoyancy in freshwater** Neutral

**Lithium-ion Battery 36v** 8.75 kg [19.29 lbs]

**Material** Length Technopolymers, stainless steel, aluminum

**Charging time 6.5 to 7 hours.**

\* Factory can give autonomy in electric runtime. The speed and distance depends on the diver and his team, as well as its position, and configuration management.
